

# What's in your "Real Fruit" Smoothie?

Preservatives?

Artificial Flavors?

Artificial Color?

## Dr. Smoothie Brands®

1730 Raymer Ave., Fullerton CA 92833

**The Problem:** Are you serving smoothies that contain the preservative Potassium Sorbate? When was the last time you read the label?

Fundamentally, potassium sorbate is non-toxic and is regarded as safe. However, its synthetic characteristic is not considered too favorable by some experts. Prolonged use of the preservative could lead to allergic reactions, nausea, diarrhea and nutrient loss.

**Your Solution:** Why settle and serve your customers anything that could be harmful when you can serve a healthier product without preservatives. Dr. Smoothie's 100% Crushed is free of artificial colors, flavors or preservatives and is shelf stable.

Enjoy 5 servings of fruit in each 20 oz beverage.  
Give us a call today and make the switch to a healthier choice!
