

# What's in your "Real Fruit" Smoothie?

Preservatives?

Artificial Color?

Artificial Flavors?

## Dr. Smoothie Brands®

1730 Raymer Ave., Fullerton CA 92833

**The Problem:** Did you know that sodium benzoate and potassium benzoate (preservatives) form benzene, a known carcinogen? Benzene has been linked to leukemia, liver damage, Parkinson's disease and may also cause asthma and hives in sensitive persons? Have you read the label lately? Does your smoothie mix contain this toxin?

**Your Solution:** Dr. Smoothie® 100% Crushed® contains no preservatives, no artificial colors, no artificial flavors and is shelf stable. Our 100% fruit smoothies contain 5 servings of fruit in a 20 oz beverage.

Make the switch today to a healthier smoothie and say NO to preservatives!
